Overview Repositories **0** Stars **0** Followers **0** Following **0**

Popular repositories

You don't have any repositories yet.

1 contribution in the last year Contribution settings 

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Jan
Mon													
Wed													
Fri													

[Learn how we count contributions.](#) Less    More

This is your **contribution graph**. Your first  is for joining GitHub and you'll earn more as you make [additional contributions](#). More contributions means a darker green square for that day. Over time, your chart might start looking [something like this](#).

We have a quick guide that will show you how to create your first repository and earn more green squares!

Github class repository:

Quick setup — if you've done this kind of thing before

[Set up in Desktop](#) or [HTTPS](#) [SSH](#)

We recommend every repository include a [README](#), [LICENSE](#), and [.gitignore](#).

...or create a new repository on the command line

```
echo "# cmp220pitts" >> README.md
git init
git add README.md
git commit -m "first commit"
git remote add origin https://github.com/amypitts01/cmp220pitts.git
git push -u origin master
```

...or push an existing repository from the command line

```
git remote add origin https://github.com/amypitts01/cmp220pitts.git
git push -u origin master
```

or import code from another repository

I was not able to find the green button that says clone or download. I did follow the direction on the clone/ download github page and I believe it is now cloned. My mac told me to also download a developer tool to be able to clone the repository.

Cloning a repository - User Documentation

6 Type `git clone`, and then paste the URL you copied in Step 2.

```
$ git clone https://github.com/YOUR-USERNAME/YOUR-REPOSITORY
```

7 Press Enter. Your local clone...

```
$ git clone https://github.com/amypitts01/cmp220pitts.git
Cloning into 'Spoon-Knife'...
remote: Counting objects 1..1
remote: Compressing objects 1..1
remote: Total 10 (delta 0)
Unpacking objects: 100% (10/10)
```

The "git" command requires the command line developer tools. Would you like to install the tools now?

Choose Install to continue. Choose Get Xcode to install Xcode and the command line developer tools from the App Store.

[Get Xcode](#) [Not Now](#) [Install](#)

Amy — bash — 80x24

```
Last login: Mon Jan 16 19:22:09 on console
148-100-162-253:~ Amy$ cd /
-bash: cd: command not found
148-100-162-253:~ Amy$ pwd
/Users/Amy
148-100-162-253:~ Amy$ java -version
No Java runtime present, requesting install.
148-100-162-253:~ Amy$ javac -version
No Java runtime present, requesting install.
148-100-162-253:~ Amy$ javac -version
javac 1.8.0_121
148-100-162-253:~ Amy$ git clone https://github.com/amypitts01/cmp220pitts.git
xcode-select: note: no developer tools were found at '/Applications/Xcode.app', requesting install. Choose an option in the dialog to download the command line developer tools.
148-100-162-253:~ Amy$
```

This is the terminal saying that I cloned the repository.

```
Amy — bash — 80x24
Last login: Mon Jan 16 19:22:09 on console
148-100-162-253:~ Amy$ chdir
-bash: chdir: command not found
148-100-162-253:~ Amy$ pwd
/Users/Amy
148-100-162-253:~ Amy$ java -version
No Java runtime present, requesting install.
148-100-162-253:~ Amy$ javac -version
No Java runtime present, requesting install.
148-100-162-253:~ Amy$ javac -version
javac 1.8.0_121
148-100-162-253:~ Amy$ git clone https://github.com/amypitts01/cmpt220pitts.git
xcode-select: note: no developer tools were found at '/Applications/Xcode.app',
requesting install. Choose an option in the dialog to download the command line
developer tools.
148-100-162-253:~ Amy$ git clone https://github.com/amypitts01/cmpt220pitts.git
Cloning into 'cmpt220pitts'...
warning: You appear to have cloned an empty repository.
Checking connectivity... done.
148-100-162-253:~ Amy$
```

This is the HTTPS: <https://github.com/amypitts01/cmpt220pitts.git>

Done! All the work was done on my computer at my desk which is in the background.
